

Weekly Research Seminar Series

Organized by

WAR-DRIVING AND DOS ATTACKS ON WIRELESS LAN

Biju Issac

School of IT & Multimedia

Swinburne University of Technology (Sarawak Campus)

Abstract

This would be a summary of some related papers to be presented in IEEE International Conference on Networks (ICON 2005) during November 2005. It deals with eavesdropping 802.11b/g wireless networks, breaking WEP encryption, some hacking techniques and some counter measures to be taken.

WHEN: 2nd November 2005, 3:30-4:00 PM

WHERE: Room 4.07

About the Speaker

Biju Issac is a lecturer in Information Technology in Swinburne University of Technology (Sarawak Campus). He is holding a Bachelor degree in Electronics and Communication Engineering (Bharathiar University, India) and a Master degree in Computer Applications (Calicut University, India). He is currently doing his PhD in Networking and Mobile Communications in UNIMAS, Malaysia.
